

Model 900

2D / 3D Inspection Option

Requires an Exatron workstation, a welded steel table with or without lifter for complete integration. Scanner module takes the place of one test site as shown in the above 902-4 Handler.

- For Inspection only and Test and Inspect applications
- Inspect before test, after test, or both
- Fast inspection times, even high pin count BGA's
- Models for all 2D / 3D inspection applications
- Gull wing, J-lead, BGA-Ball, MLF-saw cut
- Inspection modules by ICOS or Scanner Technologies
- Specifications and data sheets available on request
- Custom integration of customer supplied scanners available
