

## **Model 902/904**

### **Print & Apply Labeling Option**

- Field upgrades to most Model 902/904 applications
- Adds less than 1.5 seconds to overall UPH
- Prints & applies labels as small as 0.2" square
- Test applications use a label queue; no queue for label only
- Print text, 1D and 2D bar codes, logos
- Integrated Zebra 91Xi 600 dpi thermal transfer printer
- Polyester, ThremoTuff, and Kapton high temp labels
- Optional serialization software,
- Direct customer printer control option, standard
- Ideal PROM/PLD programming system

Most Model 902/904 applications can be upgraded to allow label application. When used with test, the handler sorts a good device to the output tray. The pickup head then picks up a printed label and applies it to the device in the tray. The handler will allow label only operation. The Zebra printer is set up exactly as in the Model 3000B/BL and can be interchanged.

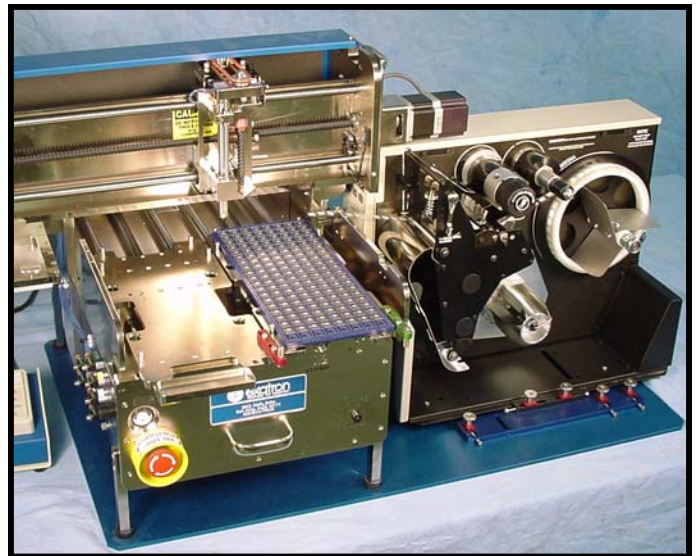

The label option is ideal for PROM/PLD/XTAL programming applications. The 902/904's internal PC can operate the handler, the Zebra printer, and some 3<sup>rd</sup> party programmers without the need of an additional PC.

The system is supplied with printer control software that meets or exceeds most of our customer's requirements. The customer can also control the printer with 3<sup>rd</sup> party software or control the printer directly.

902/904 PC controls the Zebra printer  
No additional pc required  
Exatron label software driver  
Adds: 20"W by 12"D by 16"H  
Adds: 35 lbs (printer only)  
Power: 100-240 VAC 50/60 Hz  
Air: 80 PSI 2 CFM clean shop air required  
1-year factory warranty
