

# Peel Strength Tester

- Measures cover tape peel strength from 5 to 200 grams of force
- Can be used on the leader or trailer of a reel of taped devices
- Ink plotter records measurements on paper chart
- Simple set up
- Meets EIA-481 and ISO 9000 requirements
- 100-120 VAC 60 Hz or 220-240 VAC 50 Hz (specify at time of order)

The Peel Strength Tester measures the peel strength of cover tape as it is removed from a small section of the carrier tape. The operator attaches a clip to the carrier tape, while the cover tape is attached to a capstan. The operator then holds down a button and a synchronous motor drive peels the cover tape from the carrier tape. As the cover tape is removed, the measured force is permanently recorded onto a paper chart. Once the test is completed, the paper chart can be removed, dated, and saved for future reference.

Size: 16" W, 12" H, 3" D  
Weight: 8 pounds  
No air required  
Bench top operation  
1 year factory warranty

**Options:**  
Replacement paper charts  
Replacement ink pens
